

EEMSENERGYTERMINAL PARTNERS WITH EXMAR FOR TERMINAL EXTENSION

EXMAR is pleased to announce that it has entered into a strategic partnership with EemsEnergyTerminal, a subsidiary of Gasunie and Vopak, to extend the operation of the Eemshaven LNG import terminal after 2027. As part of the collaboration, EXMAR intends to own and operate 2 Floating Storage and Regasification Units (FSRUs) with a combined storage capacity of approximately 190,000 m³ LNG.

New Floating Storage and Regasification Unit (FSRU)

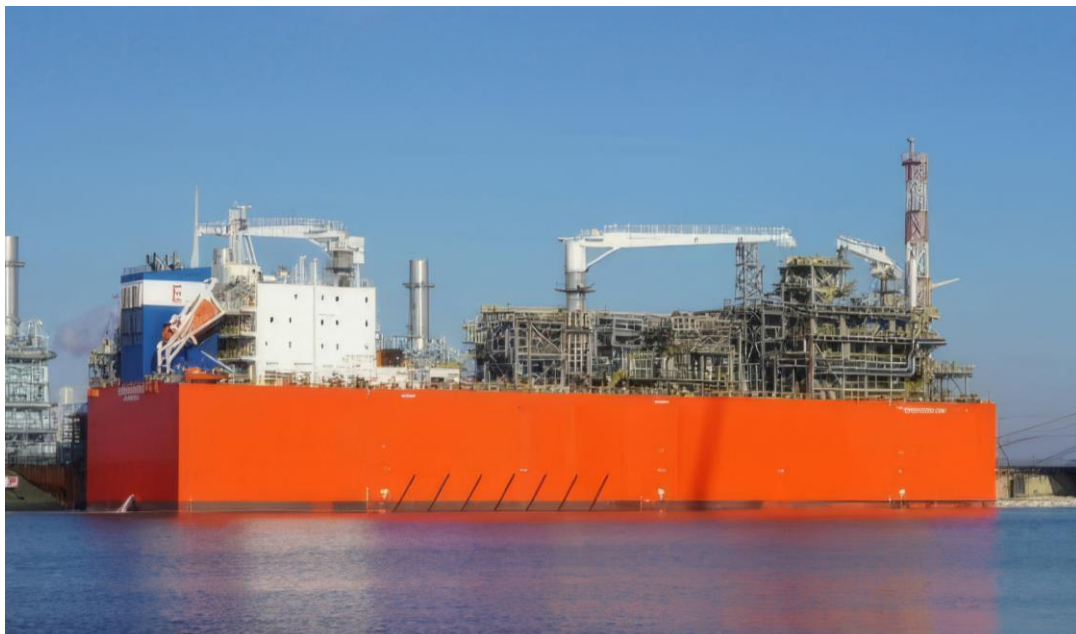

EXMAR plans to convert an LNG carrier into a modern FSRU, designed to enhance terminal efficiency. This new FSRU will then replace the existing FSRU and be positioned next to the FSRU EEMSHAVEN LNG that remains on site.

EemsEnergyTerminal's intention is to charter the 2 FSRUs from EXMAR, providing its customers with direct access to the Dutch TTF gas market. This development supports the continued diversification of supply sources and strengthens the security of supply for both the Netherlands and the Northwest European region.

Next steps

EemsEnergyTerminal expects to conclude the open season by early Q1 2026, enabling future customers to book long-term capacity at the terminal. The extension of operations is still subject to a positive Final Investment Decision.

In the coming months, EXMAR will support EemsEnergyTerminal and work with all relevant stakeholders to develop the next generation FSRU. This will ensure more efficient and reliable operations for the Eemshaven LNG import terminal.

About EXMAR

EXMAR is a provider of floating solutions for the operation, transportation and transformation of gas, and owns a fleet of 40 LPG/ ammonia carriers and various floating LNG and offshore infrastructure solutions. EXMAR's Infrastructure business is centred on developing, constructing, owning and operating floating infrastructure for the global energy sector, providing solutions across the full project including engineering, asset ownership, and operational services. These capabilities position EXMAR as a turn-key provider of innovative maritime infrastructure in both LNG and broader energy value chains. Through decades of experience in Floating LNG solutions, EXMAR has positioned itself as one of the world's most innovative expert.
